## Information Literacy Dispositions and Knowledge Practices

### IL Frames employed

#### Milestone:
* **Authority is Constructed and Contextual**
  * recognize that authoritative content may be packaged formally or informally and may include audio, visual, or other non-print sources

* **Information has Value**
  * Give credit to the original ideas of others through proper attribution and citation
  * understand that intellectual property is a legal and social construct that varies by culture

* **Searching is Strategic**
  * Determine the scope of the question or task required to meet their information needs
  * Utilize divergent (e.g., brainstorming) and convergent (e.g., selecting the best source) thinking appropriately when searching
  * Understand how information systems (i.e., collections of recorded information) are organized in order to access relevant information
  * Use citation management and networking tools to manage searching processes and results

### Sophomore – Junior Year Outcomes

#### Intermediate & Advanced Learning Outcomes

When students experience library instruction during the sophomore and junior years, librarians build on the introductory skills the students learned during their first year. As they advance, they are encouraged to depend increasingly on their critical thinking abilities, using the organization of information, controlled vocabularies within disciplines, and library tools to make their search for resources more efficient and more effective.

Library instruction during these years can be supportive of Integrative Learning projects and off-campus experiences, helping provide background information for foundational research and helping students synthesize their Integrative Learning experiences with contextualized research.

#### Knowledge Practices Concordia Librarians Teach

- Generates appropriate search terms which describe the information need (GLL 2, 3)
- Demonstrates understanding of how information is formally and informally produced, organized, and disseminated (GLL 2, 3)
- Evaluates information from various sources for reliability, validity, accuracy, authority and timeliness (GLL 2, 3, 4)
- Appraises sources for prejudice, deception, or manipulation (GLL 2, 3, 4)
- Differentiates between primary and secondary sources, recognizing how their use and importance vary with each discipline (GLL 2, 3)
- Determines the availability of needed information using link resolvers, ILL, other collections, multimedia, etc. (GLL 2, 3)
- Distinguishes characteristics of advanced databases (GLL 2, 3)
- Plans efficient, effective approaches for accessing needed information (GLL 2)
- Selects controlled vocabulary specific to the discipline or information retrieval source (GLL 2, 3)
- Employs advanced search commands (Boolean, etc.) (GLL 2, 3)
- Ethically manages source information (understands copyright, plagiarism, RefWorks, etc.) (GLL 2, 4)

---

2 Outcomes supporting Concordia’s Goals for Liberal Learning
Information Literacy Dispositions and Knowledge Practices

### Senior Year Outcomes

<table>
<thead>
<tr>
<th>Advanced: Authority is Constructed and Contextual</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>Acknowledge that they themselves are developing their own authoritative voices in a particular area and recognize the responsibilities this entails, including seeking accuracy and honesty, respecting intellectual property, and participating in communities of practice</em></td>
</tr>
<tr>
<td><em>Understand the increasingly social nature of the information ecosystem where authorities actively connect with one another and sources develop over time</em></td>
</tr>
</tbody>
</table>

**Information has Value**

*Articulate the purpose and distinguishing characteristics of copyright, fair use, open access, and the public domain*

*Recognize issues of access or lack of access to information sources*

*Understand how the commodification of their personal information and online interactions affects both the information they receive and the information they produce or disseminate online*

*Manage their online presence responsibly*

**Scholarship as Conversation**

*Summarize changes in scholarly perspective over time on a particular topic within a specific discipline*

*Recognize that they are often entering into an ongoing scholarly conversation, not a finished conversation*

*Contribute to scholarly conversation at an appropriate level (local online community, guided discussion, undergraduate research journal, conference presentation/poster session)*

**Information Creation as a Process**

*Assess the fit between an information product’s creation process and a particular information need*

*Transfer knowledge of capabilities and constraints to new types of information products*

*Develop, in their own creation processes, an understanding that their choices impact the purposes for which the information product will be used and the message it conveys*

### Uses raw data from primary sources to construct new knowledge (GLL 3, 4, 5)

### Examines and compares information from various sources in order to evaluate reliability, validity, accuracy, authority, timeliness (GLL 3, 4)

### Recognizes prejudice, deception, or manipulation in sources (GLL 2, 3, 4)

### Assesses the cultural, physical, or other context within which the information was created (GLL 3, 4)

### Judges the limitations of the information gathering tools or strategies (GLL 2, 3)

### Investigates differing views encountered in the literature (GLL 3, 4, 5)

### Maintains a record of information seeking, evaluating, and communicating process (GLL 2, 4, 5)

### Ethically and legally obtains, stores, and disseminates text, data, images, or sounds (GLL 2, 3, 4, 5)

### Selects an appropriate documentation style and uses it consistently to cite sources (GLL 4, 5)

### Recognizes and practices data hygiene with their own and others’ data (GLL 2, 3, 4, 5)

### Parlays the strengths of open-access resources to work in tandem with for-pay databases (GLL 2, 3, 4, 5)
The instruction plan developed by Concordia librarians encourages the adoption of the following dispositions for learning in the digital age:

<table>
<thead>
<tr>
<th>Framework for Information Literacy for Higher Education(^3)</th>
<th>The instruction plan developed by Concordia librarians encourages the adoption of the following dispositions for learning in the digital age.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Understanding that Information Has Value</td>
<td>Information possesses several dimensions of value, including as a commodity, as a means of education, as a means to influence, and as a means of negotiating and understanding the world. Legal and socioeconomic interests influence information production and dissemination.</td>
</tr>
<tr>
<td>Viewing Research as Inquiry</td>
<td>Research is iterative and depends upon asking increasingly complex or new questions whose answers in turn develop additional questions or lines of inquiry in any field.</td>
</tr>
<tr>
<td>Using Searching as Strategic Exploration</td>
<td>Searching for information is often nonlinear and iterative, requiring the evaluation of a range of information sources and the mental flexibility to pursue alternate avenues as new understanding develops.</td>
</tr>
<tr>
<td>Acknowledging that Authority Is Constructed and Contextual</td>
<td>Information resources reflect their creators’ expertise and credibility, and are evaluated based on the information need and the context in which the information will be used. Authority is constructed in that various communities may recognize different types of authority. It is contextual in that the information need may help to determine the level of authority required.</td>
</tr>
<tr>
<td>Participating in Scholarship as Conversation</td>
<td>Communities of scholars, researchers, or professionals engage in sustained discourse with new insights and discoveries occurring over time as a result of varied perspectives and interpretations.</td>
</tr>
<tr>
<td>Recognizing Information Creation as a Process</td>
<td>Information in any format is produced to convey a message and is shared via a selected delivery method. The iterative processes of researching, creating, revising, and disseminating information vary, and the resulting product reflects these differences.</td>
</tr>
</tbody>
</table>

Each of these Frames for Information Literacy can serve to support faculty integrative learning goals. In specific contexts, library instruction and assistance can also help scaffold High-impact Learning practices in and beyond the classroom.
